Our team makes specific tools and optimizations to address the needs of your project

Our Skills

Renderer Pipeline Optimization

Cinematic Tools

Advanced scene management

Unity tool development

MultiPlayer Management

VR and Mobile Programming

GEAR PROD

Software Engineering

Our skills does not limit to pure Game Development, we have experienced engineers working on very differents domains

Our Skills

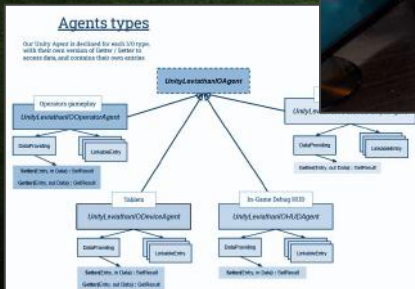

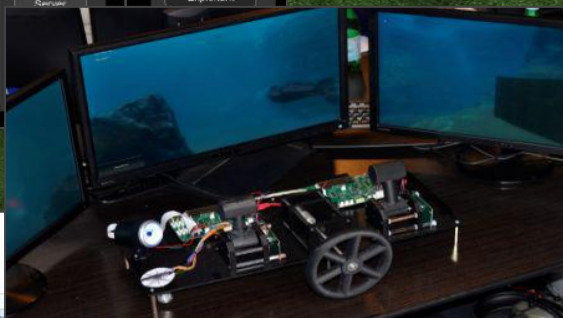

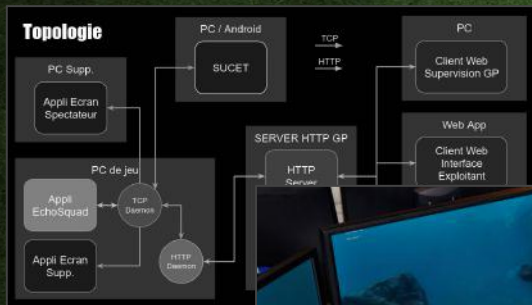

Embedded Software

DLL & Service Development

Exotic controllers

Remote data management

Software architecture

GEAR PROD

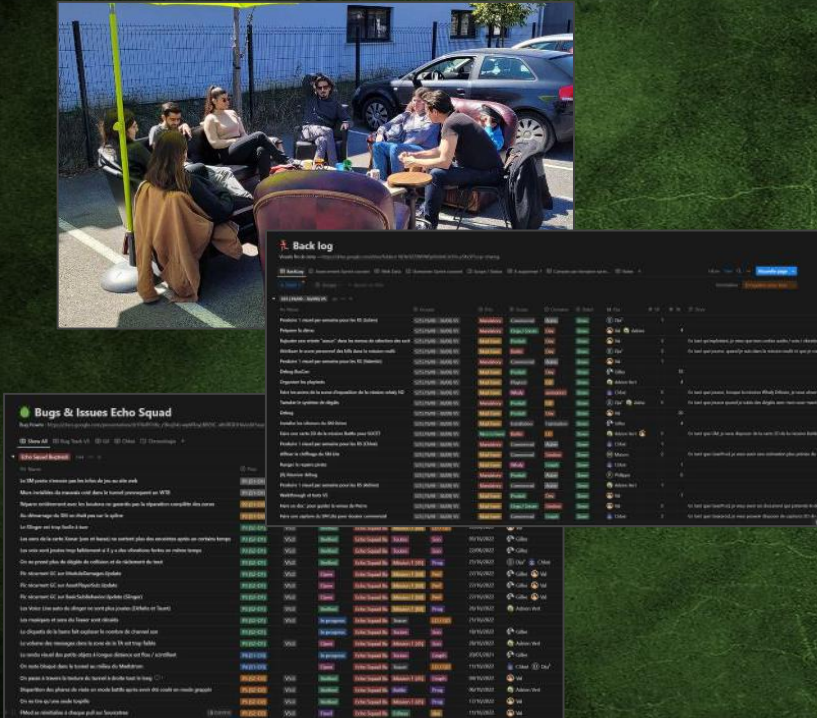

Our Skills

Agile / Scrum methodology

QA management

Knowledge management

Resource optimization

Game Design

We have worked on the design of many games from board games to ubisoft AAA. We build game projects from concept to prototype to playtests.

Our Skills

Game concept

User research

Prototyping

Level Design

PlayTest managment

Documentation

Talents for hire

As the main developments around our Echo Squad game is now behind us, we have some very talented people available to work on your projects.

Common experience

Echo Squad was a very ambitious and complex project mixing engineering, hardware management, engine programming and game play programming.

That's why every member of our team is now able to manage **complex and varied environment** with ease.

As side projects, we also worked on VR, mobile and webApp projects.

Producing efficiency

Moreover we have a fine and efficient internal producing workflow. We can handle projects with control and transparency making it easy to integrate in your projects.

Everybody at GearProd understands the importance of methodology for efficiency and will easily adapt to the one used in your organisation.

What we have done before

EchoSquad is a live action immersive game.

*In a full sized room where everything is functional,
the players crew pilots a submarine into the abyss.*

*They evolves and interact with a 3D realistic world,
because they are inside a **Video Game**.*

Watch our Trailer

What we have done before

Our team members have worked
on some mainstream titles...

... and we have also done :

Mobile Apps

VR Apps

Board Games
